According to our (Global Info Research) latest study, the global Commercial Portable Generators market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A portable generator is typically just that portable. They range in size but can usually be stored in a residential home storage shed or storage closet. They usually come with an optional wheel kit so they can be moved by hand easily. These differ greatly from mobile or towable generators and commercial generators. Commercial generators are typically much larger and produce enough power to run an entire home or commercial building. Unlike a portable generator there permanently anchored to a slab, typically run on natural gas, are hardwired into the structure with an automatic power transfer switch and are much more expensive.
