According to our (Global Info Research) latest study, the global Color Coated Steel Composite market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Steel composites are conventional metal-matrix composites in which steel is combined with other metals, ceramic materials, or polymers. Steel composites are more susceptible to corrosion, which could lead to high maintenance cost.

Color-coated composites are widely used due to their corrosion-resistance and superior strength & lightweight attributes. Thus, color-coated steel composites combine the strength of steel along with corrosion resistance and durability. Furthermore, these are resistant to fire, and provide cooling in summer while warmth in winter.
