Abstracts

According to our (Global Info Research) latest study, the global Commercial Real Estate Appraisal Services market size was valued at US$ 903 million in 2025 and is forecast to a readjusted size of US$ 1360 million by 2032 with a CAGR of 6.1% during review period.

Residential appraisal services are crucial in determining the fair market value of residential properties, including single-family homes, condominiums, and townhouses. These services are typically required during real estate transactions, refinancing, mortgage lending, and for tax purposes. Just like in residential real estate, a commercial real estate appraisal is an unbiased opinion of the value of the property. However, rather than looking at the value of single-family residences or individual condo units, a commercial real estate appraisal is used to determine the value of properties like multifamily housing units, office buildings, or retail spaces. At their core, appraisals are used to determine what a property will sell for in the current market, but they are also important in underwriting. Lenders generally will not lend more than an asset is worth, so an appraisal helps these lenders determine how much financing they can safely provide.

This report is a detailed and comprehensive analysis for global Commercial Real Estate Appraisal Services market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.
