The global Commercial Vehicle Cooling Fan market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The main function of a commercial vehicle cooling fan is to help regulate the temperature of the engine and ensure that it remains within a suitable operating range. When a commercial vehicle engine is running, it generates a large amount of heat, which if not properly cooled can cause overheating, affect engine performance and even cause damage. The cooling fan helps the radiator dissipate heat by sucking ambient air and delivering it to the radiator, thereby maintaining the normal temperature of the engine.
