Abstracts

The global Commercial Vehicle Open-Road Autonomous Driving market size is expected to reach \$ 11744 million by 2032, rising at a market growth of 49.4% CAGR during the forecast period (2026-2032).

Commercial vehicle open road autonomous driving refers to ADS-grade automation for trucks/LCVs/buses operating on public roads in open traffic (primarily highways/arterials), where—within a defined ODD—the system performs the DDT plus fallback/minimal-risk handling. Commercialization typically starts with highway hub-to-hub ODDs, then expands to broader routes and harsher conditions. Target capability is commonly SAE L3 and/or ODD-limited L4, with L2+ often used as an industry (non-SAE) transitional label.
