According to our latest research, the global Commissioning Service Operation Vessels (CSOV) market size will reach USD million in 2031, growing at a CAGR of %over the analysis period.

Commissioning Service Operation Vessels (CSOV) are specialized ships designed specifically for the installation, commissioning, and maintenance of offshore wind farms, distinguishing them from Service Operation Vessels (SOVs) which are generally used for ongoing maintenance and operational support. CSOVs are equipped with advanced equipment and features tailored for the initial setup and commissioning of wind turbines, such as dynamic positioning systems, large cranes, and walk-to-work gangways. While SOVs focus on regular service and repair tasks throughout the operational life of the wind farm, CSOVs play a crucial role during the critical early stages of deployment, ensuring the successful and efficient launch of offshore wind projects.
