Abstracts

The global Commodity Organic Fertilizer market size is expected to reach \$ 5584 million by 2032, rising at a market growth of 8.2% CAGR during the forecast period (2026-2032).

Commodity Organic Fertilizer refers to a type of organic fertilizer that is produced and sold commercially, often in bulk, for agricultural, horticultural, and landscaping purposes. It is derived from organic materials such as animal manure, plant residues, food waste, and other biodegradable materials, which are processed to make them safe, consistent, and effective as fertilizers. These products improve soil fertility by supplying essential nutrients and enhancing soil structure. In 2025, global Commodity Organic Fertilizer sales reached approximately 17,894 kilotons, with an average price of 167.5 US\$/Ton.

The growth of the commodity organic fertilizer market is mainly driven by the transition toward green agriculture, soil health restoration, partial substitution of chemical fertilizers, and rising demand from high-value crop production. As long-term overuse of chemical fertilizers has increased concerns over declining soil organic matter, nutrient imbalance, and agricultural non-point source pollution, farmers and policymakers are placing greater emphasis on organic fertilizers to improve soil structure, enhance microbial activity, support slow nutrient release, and improve crop quality. At the same time, major agricultural markets such as China continue to promote the replacement of part of chemical fertilizer use with organic fertilizers, while organic and sustainable farming systems in Europe are strengthening demand for soil fertility management and environmentally friendly agricultural inputs. In the coming years, fruits, vegetables, cash crops, protected agriculture, and organic/green food production bases are expected to be the main demand drivers, while livestock waste recycling and government-led soil

improvement projects will further expand the market space for commodity organic fertilizers.

This report studies the global Commodity Organic Fertilizer production, demand, key manufacturers, and key regions.
