The conductor of the common box enclosed busbar is made of copper-aluminum busbar or slot aluminum-slot copper, which has a compact structure, is easy to install, and has a small workload for operation and maintenance. The conductor is supported by insulators and the three phases A/B/C are fixed in the same metal casing. It is insulated by air and the casing is formed of aluminum plate, which not only has good corrosion resistance, but also can avoid the additional eddy current loss caused by the steel casing. The casing of the common box enclosed busbar is electrically connected and multi-point grounded, which can basically eliminate grounding faults caused by external moisture, dust and foreign objects during use. The casing protection level is IP54, the rated voltage is 3.6kV~40.5kV, and the rated current is 630A~8000A.
