## **Abstracts**

According to our (Global Info Research) latest study, the global Communication Modules market size was valued at US\$ 41281 million in 2025 and is forecast to a readjusted size of US\$ 72730 million by 2032 with a CAGR of 8.4% during review period.

In 2025, global Communication Module output reached about 5 billion units and global capacity of around 6 billion units. The average price is about USD 8 per unit, with gross margins near 32%. Communication Modules are integrated electronic hardware components that enable devices, machines, vehicles, industrial equipment, and IoT systems to transmit and receive data through wired or wireless communication networks. These modules typically incorporate communication chipsets, processors, memory, RF front-end components, antennas, protocol stacks, and interface circuits, supporting technologies such as cellular (2G/3G/4G/5G), Wi-Fi, Bluetooth, Zigbee, LoRa, NB-IoT, Ethernet, CAN, RS-485, satellite communication, and other industrial networking standards. Communication modules are widely used in smartphones, connected vehicles, smart meters, industrial automation systems, medical devices, security equipment, consumer electronics, and smart city infrastructure. The supply chain begins upstream with semiconductor manufacturers producing baseband processors, RF transceivers, power management ICs, memory chips, sensors, passive components, antennas, and printed circuit boards (PCBs). Midstream participants include communication module manufacturers that integrate these components into standardized modules, conduct firmware development, protocol certification, testing, and packaging. Downstream customers include OEMs, system integrators, telecom equipment vendors, automotive manufacturers, industrial automation companies, IoT solution providers, healthcare equipment manufacturers, and consumer electronics

producers, which incorporate communication modules into end products that connect to telecommunications operators, cloud platforms, enterprise networks, and industrial communication infrastructures.
