According to our (Global Info Research) latest study, the global Communications-Based Train Control (CBTC) market size was valued at USD 1884.2 million in 2023 and is forecast to a readjusted size of USD 2693 million by 2030 with a CAGR of 5.2% during review period.

Communications-based train control (CBTC) is a railway signaling system that makes use of the telecommunications between the train and track equipment for the traffic management and infrastructure control. By means of the CBTC systems, the exact position of a train is known more accurately than with the traditional signaling systems. This results in a more efficient and safe way to manage the railway traffic. Metros (and other railway systems) are able to improve headways while maintaining or even improving safety.

The main companies of global communications-based train control (CBTC) include Alstom SA, CRSC, BJ-TCT, etc. These top 3 companies hold a market share about 80%. Asia-Pacific is the largest market, with a share about 40%, followed by Europe and North America with the share about 30% and 20%. In terms of product, basic CBTC is the largest segment, with a share over 30%. And in terms of application, the largest application is passenger and freight rail system, followed by city metro system.
