According to our (Global Info Research) latest study, the global Community Care Facilities for the Elderly market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Community Care Facilities or Residential Care Facilities are services provided to geriatrics to assist their day-to-day routine of care, supervision and assistance with activities such as bathing and grooming and providing medicine as per regimen. In many cases high level of care and supervision is required when people are unable to ambulate by themselves but who do not need 24 hour nursing care. They are considered non-medical facilities and are not required to have nurses, certified nursing assistants or doctors on staff. These services are provided either home to home or at a private facility away from the patient's home. Community care facilities are strictly regulated for quality of environment and expertise of the staff.

The demand for community care has increased exponentially over the years particularly due to decreased focus and attention meted out to geriatrics by family. This is further fueled with low awareness and training in handling of serious medical situation for old people such as Alzheimer's Parkinson's, heart attack, post-surgical care and palliative care. In many situations, end-of-life care is required to be provided which cannot be given in hospitals due to over occupation of hospital premises. Other services may include adult day health care, companionship, delivery of consumables and medical supplies, counseling, emergency alert response, home repair, home-delivered meals, home nursing, legal assistance, material aid, medical therapeutic services, personal care, transportation, and other community-based services.
