The global Compact RV Refrigerator market size is expected to reach \$ 1395 million by 2032, rising at a market growth of 6.8% CAGR during the forecast period (2026-2032).

Compact RV refrigerators are onboard refrigeration devices designed specifically for RVs. They are used to store food, beverages, and medicines while the vehicle is in motion or parked, ensuring food safety and convenience during the journey. In 2025, global Compact RV Refrigerator production reached approximately 2434 k units, with an average global market price of around 350 US\$/Unit. The production capacity of Compact RV Refrigerator reaches 3000 k units, and the industry's gross profit margin is approximately between 20% and 40%.

The market demand for compact RV refrigerators continues to grow, mainly driven by multiple factors such as the rise of the global RV tourism and self-driving camping boom, consumers' increasing demands for the quality of travel and living, the popularization of new energy RVs driving the demand for high-efficiency electric refrigeration equipment, and the evolution of outdoor lifestyles towards family-oriented and long-term use. At the same time, technological advancements have enabled compressor refrigerators to continuously optimize in terms of energy efficiency, quietness, and shock resistance, further promoting their replacement of traditional absorption refrigerators and expanding their application in the mid-to-high-end RV and modification market.
