Abstracts

The global Companion Animal In-clinic Diagnostic Reagents and Consumables market size is expected to reach \$ 1466 million by 2032, rising at a market growth of 9.0% CAGR during the forecast period (2026-2032).

In 2025, global shipments of Companion Animal In-clinic Diagnostic Reagents and Consumables reached approximately 102.6 M Units, with an average selling price of around US\$7.60/Unit. Companion animal in-clinic diagnostic reagents and consumables refer to consumable in-vitro diagnostic products used in veterinary hospitals, pet clinics, and small-animal clinical settings for disease screening, health assessment, organ function testing, infectious disease detection, endocrine testing, acute-care biomarker testing, and transfusion compatibility evaluation in companion animals, primarily dogs and cats. These products mainly include standalone rapid test kits, analyzer-bound reagents and consumables, immunoassay strips, chemistry reagent discs, dry chemistry slides, molecular diagnostic cartridges, blood typing cards, crossmatching cards, quality controls, calibrators, and cleaning solutions. They are commonly based on lateral flow assays, fluorescence immunoassay, chemiluminescence immunoassay, dry and wet chemistry, microfluidics, hematology analysis, coagulation testing, and nucleic acid amplification technologies, enabling veterinarians to conduct rapid or near-patient testing for diagnosis, treatment selection, preoperative assessment, chronic disease monitoring, and follow-up care.

Market growth is mainly driven by rising pet healthcare spending, broader adoption of in-clinic testing in veterinary practices, and increasing demand for chronic disease monitoring and rapid clinical decision-making. Compared with outsourced laboratory testing, in-clinic diagnostics allow veterinarians to perform faster infectious disease

screening, preoperative assessment, acute-care evaluation, and treatment follow-up at the point of care.

From a product structure perspective, analyzer-bound reagents and consumables represent a key value driver, including chemistry reagent discs, dry chemistry slides, immunoassay strips, hematology reagents, molecular cartridges, controls, calibrators, and cleaning consumables. Standalone rapid test kits remain an essential product category, especially for high-frequency infectious and parasitic disease testing such as canine parvovirus, canine distemper, feline panleukopenia, FeLV/FIV, and heartworm. As veterinary clinics place greater emphasis on diagnostic accuracy, turnaround time, and workflow efficiency, fluorescence immunoassay, chemiluminescence immunoassay, microfluidic chemistry, and molecular POCT products are expected to gain further share.

From a competitive standpoint, the market is shaped by global veterinary diagnostics leaders, specialized rapid test manufacturers, analyzer platform suppliers, and Chinese POCT/OEM companies. Leading players benefit from installed analyzer bases, broad test menus, strong brand recognition, distribution channels, and recurring consumables demand. Chinese suppliers are becoming more active in rapid test kits, molecular POCT, microfluidic reagent discs, and analyzer-bound consumables. Going forward, competition is likely to shift from single-product pricing toward integrated capabilities across testing platforms, assay menus, reagent supply stability, and clinical workflow support.

This report studies the global Companion Animal In-clinic Diagnostic Reagents and Consumables demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Companion Animal In-clinic Diagnostic Reagents and Consumables, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Companion Animal In-clinic Diagnostic Reagents and Consumables that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Companion Animal In-clinic Diagnostic Reagents and Consumables total market, 2021-2032, (USD Million)

Global Companion Animal In-clinic Diagnostic Reagents and Consumables total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Companion Animal In-clinic Diagnostic Reagents and Consumables total market, key domestic companies, and share, (USD Million)

Global Companion Animal In-clinic Diagnostic Reagents and Consumables revenue by player, revenue and market share 2021-2026, (USD Million)

Global Companion Animal In-clinic Diagnostic Reagents and Consumables total market by Type, CAGR, 2021-2032, (USD Million)

Global Companion Animal In-clinic Diagnostic Reagents and Consumables total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Companion Animal In-clinic Diagnostic Reagents and Consumables market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include IDEXX Laboratories, Inc., Zoetis Inc., Mars, Incorporated, DMS Laboratories, Inc., Nova Biomedical Corporation, DiaSys Diagnostic Systems GmbH, Virbac, Fassisi GmbH, MegaCor Diagnostik GmbH, Biogal Galed Labs, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Companion Animal In-clinic Diagnostic Reagents and Consumables market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
