Abstracts

The global Competent E.coli market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Transformation of bacteria with plasmids is important because bacteria are used as the means for both storing and replicating plasmids. E. coli cells are more likely to incorporate foreign DNA if their cell walls are altered so that DNA can pass through more easily. Such cells are said to be 'competent.'
