According to our (Global Info Research) latest study, the global Composite Insulators market size was valued at USD 3098.3 million in 2023 and is forecast to a readjusted size of USD 5767.5 million by 2030 with a CAGR of 9.3% during review period.

Composite Insulators are special insulation controls, which include “core” and “housing”. The core is usually made of resin-impregnated glass fibers. The housing can be manufactured from a variety of materials including elastomers, resins, or fluorocarbons. Compared with ceramic insulators and glass insulators, composite insulators are less costly, lighter in weight, and have excellent hydrophobic capability.

SEVES, Lapp Insulators , Pfisterer, INAEL Electrical and Gruppo Bonomi are the leaders of the Composite Insulators industry, which take about 10% market share. China is the major region of the global market, which takes about 45% market share.
