Compostable food bags are a type of food packaging that is designed to be environmentally friendly. These bags are made from materials that can be broken down naturally over time, such as cornstarch, vegetable oil, or other plant-based materials. Unlike traditional plastic bags, which can take hundreds of years to decompose, compostable food bags can be broken down in a matter of months under the right conditions. This makes them an attractive option for consumers and businesses looking to reduce their environmental impact.

The upstream industry chain of compostable food bags includes the production of raw materials such as cornstarch and vegetable oil, as well as the manufacturing of the bags themselves. Downstream industries include food manufacturers and retailers who use the bags to package and sell their products.
