Abstracts

The global Compression Limiter market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Compression limiters are a type of insert or bushing designed to maintain joint integrity of Compression limiters from Spirola plastic assembly when tightening bolts or screws. They protect plastic parts from damage due to compression by limiting the force that gets applied to the plastic by the assembly fasteners. Compression limiters are designed for applications where the tightening load of the bolt or screw will compress, crack, or otherwise damage the plastic component. They provide a strong and reliable defense against the stresses caused by fastener torque.

This report studies the global Compression Limiter production, demand, key manufacturers, and key regions.
