Abstracts

Computer-aided design (CAD) is the use of computer systems (or workstations) to aid in the creation, modification, analysis, or optimization of a design. CAD software is used to increase the productivity of the designer, improve the quality of design, improve communications through documentation, and to create a database for manufacturing. CAD output is often in the form of electronic files for print, machining, or other manufacturing operations. The term CADD (for Computer Aided Design and Drafting) is also used.

SCOPE OF THE REPORT:

This report studies the Computer-aided Design (CAD) market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Computer-aided Design (CAD) market by product type and applications/end industries. The adoption of CAD design platform in various manufacturing industries and disciplines to generate models and drawings is the major driver for the growth of global CAD market. The increasing adoption of virtual platforms for product development in manufacturing industries is expected to drive the consumption of CAD software.
