According to our (Global Info Research) latest study, the global Computer Aided Design (CAD) Software market size was valued at USD 19080 million in 2023 and is forecast to a readjusted size of USD 28870 million by 2030 with a CAGR of 6.1% during review period.

This report mainly studies computer aided design (CAD) software market. Computer-aided design (CAD) is the use of computers (or workstations) to aid in the creation, modification, analysis, or optimization of a design. CAD software is used to increase the productivity of the designer, improve the quality of design, improve communications through documentation, and to create a database for manufacturing.

Geographically, North America holds the largest share of the CAD software market in 2022 and is expected to continue leading the industry during the forecast period. This is mainly due to the widespread adoption of CAD software for product prototyping by the aerospace and defense industry in the region, which is used to facilitate the process of imaging, creating, and improving aircraft designs. The CAD software market is expected to exhibit the fastest growth in the Asia Pacific region during the forecast period. This is mainly attributed to the widespread adoption of CAD-software in China, Japan, and India.
