Scope of the Report:

This report studies the Computer Aided Dispatch market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Computer Aided Dispatch market by product type and applications/end industries.

The cloud deployment type is expected to grow at a higher CAGR during the forecast period. CAD agencies from all verticals and of all sizes are moving from the on-premises to the cloud deployment type, as cloud deployment reduces the overall costs, provides flexibility with advanced technology, offers scalable access to solutions, ensures enforcement of security compliances, and enhances business efficiency. A major advantage of the cloud deployment type is that it provides real-time information from a remote location. For instance, when dispatchers enter a location into the CAD system, the users can view the previous legal report of that location. Tiburon (now acquired by TriTech Software Systems) is a leading vendor in the Computer Aided Dispatch market, and it offers an integrated CAD in a cloud environment that is both affordable and future-ready. Due to the above mentioned advantages, most of the vendors are switching from the on-premises deployment type to the cloud deployment type.

The global Computer Aided Dispatch market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of 11.8% between 2017 and 2023.
