The global Concentrated Chinese Medicine Granules market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

In the past five years, benefiting from factors such as the improvement of people's health care knowledge, increased purchasing power, and policy support, the market size of the Chinese medicine formula granule industry has continued to grow.

Traditional Chinese medicine formula granules are a new type of medicine with uniform specifications, uniform doses, and uniform quality standards, which are processed by extracting, separating, concentrating, drying, granulating, packaging and other production processes with traditional Chinese medicine decoction pieces as raw materials. Its active ingredients, nature, taste, indications, and efficacy are exactly the same as those of traditional Chinese medicine decoction pieces. It maintains all the characteristics of traditional Chinese medicine decoction pieces. Decoction is troublesome, but at the same time, single-flavor granules can be taken flexibly, which is hygienic and effective.
