## Abstracts

Scope of the Report:

This report focuses on the Concentrating Solar Power in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The report segments the concentrating solar power market based on end-users into utilities, enhanced oil recovery and others (mining & desalination). Utilities segment is the largest end-user of concentrating solar power owing to the growing number of medium to large scale projects under development and in pipeline across the globe. Based on technology, the parabolic trough segment is expected to dominate the concentrating solar power market during the forecast period. The market has also been segmented based on the components into three sub-segments: solar field, power block and thermal storage. The solar field segment is the largest market; due to large number of complex and costly subcomponents within the segment.

The worldwide market for Concentrating Solar Power is expected to grow at a CAGR of roughly 10.3% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
