Abstracts

Concrete bonding agent is a material formulated for bonding new concrete/plaster with an old one. It needs to be applied onto the pre-existing concrete to ensure successful adherence of the fresh concrete over it. Scope of the Report:

This report focuses on the Concrete Bonding Agent in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

This is required because cement within a concrete mix is without any natural bonding agents. Thus, when a fresh concrete is added on an old mature layer of concrete, the two won't join together and act as separate layers until concrete bonding agent is added between them. The main use of this material is in repairing, flooring, decorative applications, and others.

The worldwide market for Concrete Bonding Agent is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
