According to our (Global Info Research) latest study, the global Concrete Breakers market size was valued at USD 580.6 million in 2023 and is forecast to a readjusted size of USD 902.8 million by 2030 with a CAGR of 6.5% during review period.

Concrete Breakers are used in metallurgy, mining, construction, chemical industry, water conservancy and railway departments.

Growing construction and infrastructure development: The construction industry plays a significant role in driving the demand for concrete breakers. As infrastructure development projects continue to increase globally, the demand for concrete breakers is also rising. The construction of roads, bridges, buildings, and other structures requires the demolition of existing concrete, driving the need for concrete breakers. **Increasing adoption of demolition robots:** Demolition robots, equipped with concrete breakers, are gaining popularity in the construction industry. These robots offer enhanced safety, precision, and efficiency in breaking concrete structures. They can be remotely operated and are often used in hazardous or confined spaces where human operators may face risks. The adoption of demolition robots with concrete breakers is expected to grow as construction companies seek to improve productivity and worker safety.
