## Abstracts

According to our (Global Info Research) latest study, the global Concrete Drum Mixer market size was valued at US\$ 2462 million in 2025 and is forecast to a readjusted size of US\$ 3648 million by 2032 with a CAGR of 5.8% during review period.

In 2025, global sales of concrete drum mixers reached 1.65 million units, with an average selling price of US\$1,450 per unit. A concrete drum mixer is a construction equipment that uses a rotating cylindrical structure to uniformly mix materials such as cement, sand, and water. It is widely used in building construction, municipal construction, road construction, and rural infrastructure construction. The equipment mainly consists of a drum, transmission system, electric motor or diesel power system, support frame, and control mechanism. During the drum's rotation, internal spiral blades tumble and mix the materials, forming a uniform and stable concrete slurry. This equipment features simple structure, easy mobility, strong adaptability, and low maintenance costs, making it particularly suitable for small and medium-sized construction sites and decentralized projects. Upstream raw materials mainly include structural steel plates, motors, reducers, bearings, and rubber tires. Upstream suppliers are mainly steel companies, motor manufacturers, and mechanical parts suppliers. Downstream demand mainly comes from construction companies, engineering contractors, and the rural self-built construction market. The global industry's total production capacity is approximately 2.1 million units, with an average gross profit margin of approximately 16%. With the continued advancement of infrastructure construction in emerging economies and the growing demand for rural construction and small-scale engineering projects, concrete drum mixers will continue to have stable demand in small and medium-sized projects and decentralized construction scenarios. At the same time, upgrades in lightweight, energy-saving, and intelligent control

equipment will bring new market opportunities to the industry.
