According to our (Global Info Research) latest study, the global Concrete Expansion Joint market size was valued at US\$ 943 million in 2024 and is forecast to a readjusted size of USD 1137 million by 2031 with a CAGR of 2.7% during review period.

Concrete joints are used to compensate when concrete expands or shrinks with changes in temperature. Concrete joints are normally used to prevent cracks when the concrete shrinks by creating forming, tooling, sawing and placing joint formers. The pre-planned cracks will provide a better finish concrete product and will be formed in specific locations where those cracks could be monitored. Sometimes because of the material and width or span of the concrete joints are required to improve the performance of the material and allow the materials to expand/contract or move without damaging other structures.

Global Concrete Expansion Joint key players include ZKHY, Roaby, GCP Applied Technologies, etc. Global top three manufacturers hold a share over 10%.

Asia-Pacific is the largest market, with a share about 45%, followed by Europe, and North America, both have a share about 40 percent.

In terms of product, Asphalt Expansion Joint is the largest segment, with a share over 35%. And in terms of application, the largest application is Buildings, followed by Roads, Bridges, etc.
