Abstracts

The global Concrete Mold Release Agent market size is expected to reach \$ 2908 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

Concrete Mold Release Agent is a specialized chemical formulation applied to formwork surfaces before concrete casting, creating a thin, lubricating barrier that prevents adhesion between wet concrete and mold materials during curing. It enables clean, easy demolding while preserving concrete surface quality, reducing damage risk, and extending template lifespan across construction applications with diverse formulations optimized for different mold types, environmental conditions, and performance requirements.

In 2025, global Concrete Mold Release Agent production reached approximately 1,101 kilotons, with an average global market price of around US\$ 1,800 per unit.

Upstream consists of providers of base oils (mineral, vegetable), petroleum derivatives, surfactants, emulsifiers, and performance additives alongside specialized packaging materials; midstream manufacturers blend raw materials into finished products through chemical synthesis, emulsification, and quality testing, offering water-based, oil-based, and solvent-based formulations; downstream customers include precast concrete producers, construction contractors, and infrastructure developers, applying the agent to steel, wood, aluminum, or plastic formwork in building construction, bridge engineering, and precast component manufacturing.

The cost structure is dominated by raw material expenses (base oils, specialty chemicals, and performance additives), followed by production costs including blending,

emulsification, and quality control; packaging (drums, totes), logistics, and storage also contribute, while premium formulations incur higher costs for R&D, environmental compliance, and specialized performance features; dilution ratios, application efficiency, and product yield significantly influence overall cost-effectiveness.

This report studies the global Concrete Mold Release Agent production, demand, key manufacturers, and key regions.
