Abstracts

The global Concrete Saw market size is expected to reach \$ 3802 million by 2032, rising at a market growth of 6.8% CAGR during the forecast period (2026-2032).

A city is built when there are houses, industrial and commercial buildings, factories, markets, roads etc. That means a lot of work for the builders, plumbers, electricians, laborers. Their work includes working with tools like mechanical and electrical drills, saws, grinders etc. Working with concrete can be tough and that is why Core and Saw provides quality tools to support such building activities. At this situation, the concrete saw is necessary.

There are several basic advantages to concrete cutting. Where a jackhammer leaves behind a rough or jagged edge, a concrete saw leaves behind an accurate, predictable line. Modern saws also come equipped with vacuums that suck up dust as they cut and greatly reduce the amount of concrete and masonry dust circulating around your worksite. In addition, concrete saws have the power to quickly cut through masonry and concrete, and thereby help reduce the amount of time it takes to complete your project.

The concrete saw can also use to make openings in concrete ceilings or cut through concrete slabs or walls, reinforced concrete, masonry or stone.

The key players are Husqvarna, Makita, Hilti, Stihl, Norton (Saint-Gobain), Dewalt, MK Diamond, Evolution Power Tools, QVTOOLS, Ryobi and Hitachi, etc.

Europe is the dominate producer of Concrete Saw in Global, accounting for about 30% of the total amount, followed by Japan and North America, with the production market share of 20% and 20%.

This report studies the global Concrete Saw production, demand, key manufacturers, and key regions.
