Cone bottom tanks are specialized storage containers that have a circular, conical bottom shape. These tanks are typically made out of strong and durable materials like polyethylene, fiberglass, or stainless steel, and are used to store a variety of substances ranging from liquids to granular materials. Cone bottom tanks are popular in industrial settings where materials need to be effectively stored and easily accessed. The design of the tank allows for efficient discharge of materials by gravity or pump, and the conical shape ensures that residual materials are minimized and easy to remove. Cone bottom tanks are commonly used in applications such as chemical processing, food and beverage production, oil and gas storage, and wastewater treatment.
