According to our (Global Info Research) latest study, the global Cone Crusher market size was valued at USD 1357.4 million in 2023 and is forecast to a readjusted size of USD 1665.6 million by 2030 with a CAGR of 3.0% during review period.

A cone crusher is similar in operation to a gyratory crusher, with less steepness in the crushing chamber and more of a parallel zone between crushing zones. A cone crusher breaks rock by squeezing the rock between an eccentrically gyrating spindle, which is covered by a wear-resistant mantle, and the enclosing concave hopper, covered by a manganese concave or a bowl liner. As rock enters the top of the cone crusher, it becomes wedged and squeezed between the mantle and the bowl liner or concave. Large pieces of ore are broken once, and then fall to a lower position (because they are now smaller) where they are broken again. This process continues until the pieces are small enough to fall through the narrow opening at the bottom of the crusher.

The major players in global Cone Crusher market include Sandvik, Liming Heavy Industry, Puzzolana, Hongxing Group, etc. The top 4 players hold about 20% of global shares.
