According to our (Global Info Research) latest study, the global Conference Equipment Rental market size was valued at US\$ 4668 million in 2025 and is forecast to a readjusted size of US\$ 6590 million by 2032 with a CAGR of 5.0% during review period.

Conference equipment rental is a comprehensive technical service provided to clients for various scenarios including conferences, forums, summits, exhibition events, corporate annual meetings, product launches, government meetings, international conferences, and hybrid meetings. It focuses on professional equipment such as audio, video, display, lighting, stage, simultaneous interpretation, video production, live streaming, network and control systems. Services include equipment rental, solution design, transportation, installation, commissioning, on-site operation, technical support, and dismantling support, all tailored to the project lifecycle.

From a demand structure perspective, corporate meetings, industry summits, government meetings, medical conferences, exhibition forums, and multinational hybrid meetings remain the core sources of demand. Following the pandemic, business activities have resumed, but customer requirements for meeting formats have changed: purely offline meetings are decreasing, while meetings incorporating live streaming, recording, remote connections, interactive voting, multi-venue simultaneous interpretation, multilingual simultaneous interpretation, and data playback are increasing. LED screens, PTZ cameras, networked audio, AV-over-IP, live encoders, and interactive meeting equipment are gradually becoming standard features for medium to large-scale meetings. According to AVIXA's official data, Pro AV is still growing overall, with Live Events and Venues & Events being key scenarios, consistent with the recovery and upgrading trend of the meeting equipment rental market.
