## Abstracts

According to our (Global Info Research) latest study, the global Conformal Coating AOI System market size was valued at US\$ 429 million in 2025 and is forecast to a readjusted size of US\$ 793 million by 2032 with a CAGR of 9.3% during review period.

The core purpose of the coating process is to apply a thin film to the surface of electronic equipment. This film acts as a shield to effectively isolate the potential corrosion of electronic components from the external environment. The AOI system after coating plays the role of quality guardian. It intervenes immediately after the coating process and uses cutting-edge high-precision optical technology to meticulously check the integrity of the coating layer. The system can accurately identify subtle defects such as bubbles, cracks, and uneven coating to ensure that the coating quality meets high standards.
