Abstracts

A conformal coating is a very thin protective material applied to a printed circuit board (PCB) on which a plug-in component has been soldered. It can enhance the moisture-proof and anti-fouling ability of electronic circuits and components and prevent erosion of solder joints and conductors. It can also play a role in shielding and eliminating electromagnetic interference and preventing short-circuit of the circuit, and improve the insulation performance of circuit boards. In addition, the protective coating film is also beneficial to the friction and solvent resistance of the circuit and components, and can release the pressure caused by periodic changes in temperature, improve the stability of electronic products, and extend the service life.

Scope of the Report:

This report focuses on the Conformal Coating in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. First of all, increasing demand for Conformal Coating Market in Consumer Electronics, Automotive & Transportation and Aerospace & Defense coupled with the increasing amount of product is expected to result in the growth of the market. Second, APAC led the global market with over 57% revenue shares in 2017. China may contribute to over 50% shares in the regional market.
