## Abstracts

According to our (Global Info Research) latest study, the global Consumer Grade Camera Drone market size was valued at US\$ 3560 million in 2025 and is forecast to a readjusted size of US\$ 7810 million by 2032 with a CAGR of 12.0% during review period.

Consumer-grade camera drone is a portable aircraft designed for general consumers and professionals for aerial photography and videography. It integrates a high-resolution camera, an intelligent flight control system, and user-friendly remote controls to easily achieve stable hovering and precise flight path planning. Due to its compact size, ease of use, and powerful imaging capabilities, this type of drone is widely used for travel vlogging, family events, social media sharing, and personal creative projects, making it an ideal tool for capturing unique perspectives. In 2024, the production of consumer grade camera drones was 6.78 million units, with an average price of 455 USD per unit.

With the explosive growth of social media and the content creation industry, consumer demand for high-quality visual content is continuously rising, which brings immense opportunities to the consumer-grade camera drone market. Technological advancements, such as longer battery life, better anti-shake functionality, and smarter obstacle avoidance, have significantly lowered the barrier to entry, attracting more non-professional users. Furthermore, the increasing popularity of drones in travel, outdoor adventures, and event photography, along with more affordable prices, will continue to drive rapid market expansion. In the future, this market is expected to grow, fueled by technological innovation and diversifying application scenarios.
