According to our (Global Info Research) latest study, the global Consumer Grade Drone market size was valued at USD 9155.6 million in 2023 and is forecast to a readjusted size of USD 19830 million by 2030 with a CAGR of 11.7% during review period.

With the improvement of people's living standards and the popularization of drone technology, more and more people are beginning to try and buy drones. Consumers’ awareness of drone technology is also increasing, which is further driving the expansion of the drone market. Consumer drones are also continuing to “evolve.” For example, drones are developing in the direction of miniaturization, miniaturization, 'extended' battery life, and network clustering. Micro-UAVs like the 'Black Hornet' and 'Hummingbird' not only have the advantages of long endurance and real-time video transmission, but also replace traditional large-scale UAVs in many application scenarios. In the future, with the continuous development of drone technology, the performance and functions of consumer drones will be even better.
