Abstracts

The global Consumer Grade Underwater Robots market size is expected to reach \$ 153 million by 2032, rising at a market growth of 9.8% CAGR during the forecast period (2026-2032).

Consumer Grade Underwater Robots refer to underwater robotic devices designed and marketed for general consumers rather than professional or industrial use. They are typically used for recreational purposes, underwater photography, exploration, and basic observation tasks. These robots usually feature remote control or semi-autonomous operation, operate in relatively calm waters such as pools, lakes, and shallow seas, and are equipped with cameras for real-time video transmission or recording. Compared with professional or industrial underwater robots, they have more limited depth capability, endurance, payload capacity, and environmental adaptability, but offer advantages in affordability, ease of use, and portability.

In 2025, sales of consumer-grade underwater robots reached 70,000 units, with a unit price of \$1,100 and a gross margin of 40%.

This report studies the global Consumer Grade Underwater Robots production, demand, key manufacturers, and key regions.
