IPL stands for Intense Pulsed Light technology. IPL, or Intense Pulsed Light, is a device that emits powerful flashes of light from a flash lamp. These flashes generate heat, which can destroy capillaries. Home IPL hair removal devices apply very gentle pulses of light to the hair root. This makes the hair go into its resting phase: the hair falls out, and gradually body grows less hair in that area. That smoothness lasts a long time, too. IPL (Intense Pulsed Light) hair removal has become an increasingly popular method of getting rid of unwanted hair.
