Abstracts

According to our (Global Info Research) latest study, the global Concrete Bonding Agent market size was valued at USD 2854.4 million in 2023 and is forecast to a readjusted size of USD 3871.3 million by 2030 with a CAGR of 4.4% during review period.

Concrete bonding agent is a material formulated for bonding new concrete/plaster with an old one. It needs to be applied onto the pre-existing concrete to ensure successful adherence of the fresh concrete over it.

This is required because cement within a concrete mix is without any natural bonding agents. Thus, when a fresh concrete is added on an old mature layer of concrete, the two wont join together and act as separate layers until concrete bonding agent is added between them. The main use of this material is in repairing, flooring, decorative applications, and others.

The Global Info Research report includes an overview of the development of the Concrete Bonding Agent industry chain, the market status of Building & Construction (Latex Based, Epoxy Based), Road & Infrastructure (Latex Based, Epoxy Based), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Concrete Bonding Agent.
