Contact cement is a type of adhesive that is known for its strong bonding capabilities. It is commonly used in various applications such as woodworking, construction, and crafting. Contact cement is typically available in liquid or gel forms, and it is applied by brushing or rolling it onto the surfaces to be bonded. Once the adhesive is applied, the two surfaces are pressed together firmly and allowed to bond for several hours. Contact cement creates an instant bond and offers excellent resistance to temperature, moisture, and chemicals.
