Abstracts

The cardiac mapping market is segmented into contact cardiac mapping and non-contact cardiac mapping. The market for contact cardiac mapping is expected to grow fastest in the forecast period. The advantages provided by contact cardiac mapping, such as detecting the precise location of mapping and ablation catheters in a three-dimensional environment, and the use of a multi-electrode basket catheter, recording only a few beats are sufficient to discover arrhythmia circuits; these factors are increasing their adoption. Therefore, the demand for cardiac mapping equipment for diagnosing complex arrhythmias is also increasing.

According to our (Global Info Research) latest study, the global Contact Heart Mapping market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.
