The contact lens AOI defect machine is a specialized optical inspection solution designed for the contact lens manufacturing process. It utilizes high-resolution industrial cameras and intelligent image processing algorithms to perform fully automated, non-contact inspection of lens surface quality. The system efficiently detects a variety of defects such as bubbles, scratches, cracks, foreign particles, edge imperfections, and dimensional deviations, ensuring that each lens meets strict quality standards before leaving the factory. By integrating AOI technology, the system significantly improves inspection efficiency and consistency while reducing human error, making it a key component in achieving intelligent manufacturing and high-quality control in contact lens production.
