## Abstracts

According to our (Global Info Research) latest study, the global Contact Lenses market size was valued at US\$ 14620 million in 2024 and is forecast to a readjusted size of USD 19180 million by 2031 with a CAGR of 4.0% during review period.

Contact lenses are medical devices designed to be placed directly on the surface of the eye to correct vision impairments, such as myopia, hyperopia, astigmatism, and presbyopia. They can also serve cosmetic purposes by altering the eye's appearance. Made from a variety of materials like soft hydrogel, silicone hydrogel, or rigid gas-permeable materials, contact lenses are categorized into disposable, extended wear, and rigid types.

### Market Trends in Asia-Pacific

The Asia-Pacific market for contact lenses has shown robust growth in recent years, fueled by increasing demand for vision correction due to rising myopia rates, especially among younger populations. The shift toward urban lifestyles, higher disposable incomes, and greater awareness of eye health are contributing to the expansion of this market. Furthermore, the growing popularity of cosmetic lenses, which not only correct vision but also enhance eye appearance, is driving the demand for colored and decorative lenses in countries like Japan, South Korea, and China.

Key industry leaders in the region include Johnson & Johnson Vision Care, Alcon, CooperVision, and Bausch + Lomb. These companies dominate the market with innovative product offerings and cutting-edge lens technologies. Johnson & Johnson Vision Care, with its Acuvue brand, is renowned for its comfort and innovation in daily disposable lenses. Alcon, a subsidiary of Novartis, is recognized for its precision in lens

technology, especially in multifocal lenses. CooperVision excels in specialized lenses, particularly those designed for astigmatism and myopia control, while Bausch + Lomb offers a comprehensive range of products from standard vision correction to lenses for presbyopia.

Emerging trends in the Asia-Pacific market include the increasing preference for daily disposable lenses, which offer improved hygiene and convenience, as well as an uptick in demand for lenses with UV protection and blue light filtering properties. Additionally, advancements in materials, such as silicone hydrogel, are enhancing lens comfort and oxygen permeability, contributing to market growth. The demand for toric lenses to correct astigmatism is also rising, as consumers seek more precise vision correction solutions.
