## Abstracts

The global Contactless Scanner market size is expected to reach \$ 213 million by 2032, rising at a market growth of 5.6% CAGR during the forecast period (2026-2032).

In 2025, global Contactless Scanner production reached approximately 132 k units, with an average global market price of around US\$1,042 per unit. A contactless scanner, also called an overhead scanner, is a device that captures surface information or images without physical contact. Using optical, laser, or infrared technology, it enables high-precision measurements, document scans, or barcode reading, widely applied in industrial inspection, retail, and medical data collection.

The global contactless scanner market is in a phase of steady development, primarily driven by the ongoing digital transformation across industries and the persistent demand for paperless operations. Currently, the deepening application in high-end manufacturing, such as 3D visual digital inspection within aerospace and automotive manufacturing, serves as a key market driver. Companies are focusing on R&D to enhance scanning accuracy, device portability, and intelligence, while expanding into higher value-added solution offerings. Future trends center on technology integration, like combining 3D scanning with Augmented Reality (AR) to create more immersive experiences and unlock new applications in fields like industrial design and healthcare. Furthermore, integration with cloud computing and Artificial Intelligence (AI) is expected to advance automated data processing and remote collaboration capabilities. Key market opportunities lie in the digitalization progress of small and medium-sized enterprises in emerging markets, alongside growing demand in niche professional fields such as cultural heritage preservation. However, the industry faces challenges, including the need for continuous high R&D investment to maintain technological competitiveness, and the remaining dependence on imported equipment in specific high-end segments of some regional markets.

This report studies the global Contactless Scanner production, demand, key

manufacturers, and key regions.
