## Abstracts

According to our (Global Info Research) latest study, the global Container Glass Recycling market size was valued at USD 1051.6 million in 2023 and is forecast to a readjusted size of USD 1324.4 million by 2030 with a CAGR of 3.3% during review period.

This report mainly studies Container Glass Recycling market. Glass Recycling is the processing of waste glass into usable products. Glass waste should be separated by chemical composition, and then, depending on the end use and local processing capabilities, might also have to be separated into different colors. When glass is used for new container manufacturing, it is virtually infinitely recyclable. The processing and use of recycled glass in manufacturing conserves raw materials, and reduces energy consumption. That which is not recycled, but crushed, reduces the volume of waste sent to landfills.
