Abstracts

Scope of the Report:

This report studies the Containers as a Service market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Containers as a Service market by product type and applications/end industries.
The containers as a service market has been segmented on the basis of service types, deployment models, organization size, verticals, and regions. Among the service types, the security segment is expected to grow at the highest CAGR during the forecast period, and the management and orchestration segment is estimated to have the largest market size in 2017 in the CaaS market. CaaS offers various capabilities, such as operational simplicity, platform independency, resource optimization, and smooth scalability. The adoption of CaaS services among various enterprises has increased, due to the various benefits, such as faster deployment of applications, automated testing, and optimum utilization of resources.
Among the deployment models, the public cloud segment is estimated to hold the largest market share in 2017. Public cloud services are comparatively cheaper than the services offered by the other deployment models. Hence, enterprises with budget constraints tend to choose the public cloud deployment model. The public cloud deployment model offers various benefits to enterprises, such as scalability, reliability, and flexibility.

The global Containers as a Service market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of 33.4% between 2017 and 2023.
