Contamination control mats are ground coverings specifically designed to control the spread of contaminants in industrial, laboratory, or medical environments. Made from high-efficiency filter materials, they effectively adsorb and retain pollutants such as dust, particles, chemicals, and moisture, maintaining cleanliness and safety in work areas. These mats often feature anti-slip designs to ensure stability when walked on, and they are easy to clean and maintain, extending their lifespan. Contamination Control Mats have widespread applications in sectors such as electronics manufacturing, biotechnology, and food processing, serving as a crucial measure to prevent cross-contamination, safeguard product quality, and protect employee health. Their sizes and shapes can be customized to fit different work environments and layout requirements.
