Abstracts

According to our (Global Info Research) latest study, the global Continuous Ball Mill market size was valued at US\$ 532 million in 2025 and is forecast to a readjusted size of US\$ 724 million by 2032 with a CAGR of 4.5% during review period.

In 2025, global continuous ball mill production reached approximately 23480 units, the average price is 22 k usd/unit. A continuous ball mill is a grinding device that enables uninterrupted feeding and discharging of materials. Unlike batch (intermittent) ball mills, it is suitable for large-scale, assembly-line industrial production, and can continuously grind materials to the required fineness while keeping the machine running continuously.

The annual production capacity of a single continuous ball mill line is typically 1200-1500 units/year, with a gross profit margin of around 27%.

Downstream users of continuous ball mills include ceramics (36%), mining (27%), chemicals (23%), and others (14%).
