Abstracts

The global Continuous Electrodeionization Systems (CEDI) market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Continuous Electrodeionization (CEDI) is a water treatment technology used to remove ions, dissolved salts and other impurities from water. It is developed on the basis of ion exchange and electroadsorption technology.

CEDI systems usually consist of a series of alternating cation exchange membranes and anion exchange membranes with electrodes sandwiched between the two membranes. As water flows through the spaces between these membranes and electrodes, an electric field is applied to drive the migration of ions.

In the CEDI system, cations in the water will migrate from the water to the anion exchange membrane, and anions will migrate from the water to the cation exchange membrane. Through the action of the electric field, cations and anions are driven to corresponding electrodes respectively, thereby removing the ions from the water. At the same time, impurities and microorganisms will also be isolated between membranes to achieve water purification.

CEDI systems offer many advantages over traditional ion exchange technology. First, CEDI systems do not require regenerants or chemicals, thus avoiding the need for regeneration processes and waste disposal. Secondly, the CEDI system can operate continuously without shutting down or changing columns, which improves processing efficiency and stability. In addition, the CEDI system can provide water with high purity and low ion concentration, and has the advantages of easy operation and small

footprint.

This report studies the global Continuous Electrodeionization Systems (CEDI) production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Continuous Electrodeionization Systems (CEDI), and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Continuous Electrodeionization Systems (CEDI) that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Continuous Electrodeionization Systems (CEDI) total production and demand, 2018-2029, (K Units)

Global Continuous Electrodeionization Systems (CEDI) total production value, 2018-2029, (USD Million)

Global Continuous Electrodeionization Systems (CEDI) production by region & country, production, value, CAGR, 2018-2029, (USD Million) & (K Units)

Global Continuous Electrodeionization Systems (CEDI) consumption by region & country, CAGR, 2018-2029 & (K Units)

U.S. VS China: Continuous Electrodeionization Systems (CEDI) domestic production, consumption, key domestic manufacturers and share

Global Continuous Electrodeionization Systems (CEDI) production by manufacturer, production, price, value and market share 2018-2023, (USD Million) & (K Units)

Global Continuous Electrodeionization Systems (CEDI) production by Type, production, value, CAGR, 2018-2029, (USD Million) & (K Units)

Global Continuous Electrodeionization Systems (CEDI) production by Application production, value, CAGR, 2018-2029, (USD Million) & (K Units).

This reports profiles key players in the global Continuous Electrodeionization Systems

(CEDI) market based on the following parameters – company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Evoqua (Xylem), Aquatech, Veolia, Suez, SnowPure, SKion Water (Ovivo), Dupont, Deionx and Kurita Water, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Continuous Electrodeionization Systems (CEDI) market.

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (K Units) and average price (US\$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2018-2029 by year with 2022 as the base year, 2023 as the estimate year, and 2024-2029 as the forecast year.

Key Questions Answered

1. How big is the global Continuous Electrodeionization Systems (CEDI) market?
2. What is the demand of the global Continuous Electrodeionization Systems (CEDI) market?
3. What is the year over year growth of the global Continuous Electrodeionization Systems (CEDI) market?
4. What is the production and production value of the global Continuous Electrodeionization Systems (CEDI) market?
5. Who are the key producers in the global Continuous Electrodeionization Systems (CEDI) market?
