Abstracts

According to our (Global Info Research) latest study, the global Continuous Fiber Thermoplastic (CFT) Tapes market size was valued at US\$ 2853 million in 2025 and is forecast to a readjusted size of US\$ 5881 million by 2032 with a CAGR of 11.0% during review period.

Continuous Fiber Thermoplastic (CFT) tapes are high-performance composite materials consisting of continuous reinforcement fibers such as carbon fiber or glass fiber embedded within a thermoplastic resin matrix including PEEK, PPS, PA, or PP. These tapes are supplied in unidirectional or woven formats and are designed for automated lay-up, overmolding, and structural reinforcement applications in industries requiring lightweight and high-strength materials. From a value chain perspective, upstream includes carbon fiber and glass fiber producers, thermoplastic resin manufacturers, coupling agent suppliers, and prepreg processing equipment providers; midstream focuses on fiber impregnation, tape extrusion, consolidation, slitting, quality inspection, and roll packaging; downstream demand comes from automotive OEMs, aerospace manufacturers, industrial equipment producers, and renewable energy component suppliers. In 2025, the average selling price of CFT tapes is approximately US\$22.00 per unit, with global sales volume reaching around 126 million units. The industry maintains a gross margin of 28%–45%, supported by material performance differentiation, automation compatibility, and long-term structural durability.
