Continuous Flat-Press Engineered Wood Production Line is an efficient automated system designed for the production of various types of engineered wood panels, such as medium-density fiberboard (MDF) and particleboard. Utilizing continuous flat-press technology, it integrates drying, gluing, mat forming, and continuous hot pressing steps, which enable wood fibers or particles to be uniformly pressed into panels under high temperature and pressure. Compared to traditional batch production, this system offers greater efficiency and consistent product quality, making it ideal for large-scale manufacturing in industries such as furniture, construction, and decorative materials.
